

4 STEPS

To Unlocking
Your Phone

UNLOCKBASE

Unlocking your phone gives you the liberty to choose a package that fits all your needs.

It's incredibly easy to unlock your phone and make it sim-free, which is exactly what we'll be showing you here today.

At UnlockBase.com we want to help you take back control of your phone charges and costs with just 4 simple steps.

So let's begin, shall we?

Step 1: Select Your Cellphone Service

The first the first thing you need to do once you're on [UnlockBase.com](https://unlockbase.com) is select your phone's manufacturer and model.

For instance, if you have a [Samsung Galaxy J7](#), you're going to want to select Samsung as the manufacturer and J7 as the model. Now, this is actually an extremely important step because of UnlockBase's Money back guarantee.

In order to get the full scope of our services, you've got to make sure you've selected the right model, because there's no refund available once we've generated the unlock code and you chose the wrong model. So, if your phone's one of those that has many of numbers and letters in its name, like [HTC Desire 526g+](#) for instance, make sure you get every single one them right!

Then, you're going to be redirected to a page that will let you choose your **current mobile service provider**, like T-Mobile, Vodafone, or any other carrier around the world. Once you've selected your provider, you'll get the price of unlocking your phone and the approximate time you'll be receiving your unlock code.

Step 2: Find Your IMEI Number

Once you've selected your cell provider, you'll see an opt-in that will ask you for your **IMEI number**. An IMEI number, or 'International Mobile Equipment Identity' is a unique 15-digit number that's assigned to all cellular devices. Kind of like your phone's ID.

All you need to do is go to your phone's dial pad and type in the following code: ***#06#**

The numbers that pop up on the screen are your unique IMEI, so what you'll want to do is copy this and paste it into the IMEI section on the website.

We need this information to generate the exact unlock code for your phone, allowing you to turn your provider-bound phone to a SIM-free phone.

Step 3: Order Your Unlock Phone Code

Once you've entered your IMEI, you'll need to enter your email address and proceed with ordering your unlock code.

You'll be re-directed to a check-out page where you'll get to choose your way of payment.

Once you've filled out your billing information, you'll receive an email with your order confirmation. Within 24 hours, you'll receive your successfully calculated unlock code.

Many websites claim to offer the same services, but the best way to be sure you'll be getting what you paid for is by knowing you can get a full refund.

We offer a **100% money back guarantee**, meaning you'll get a refund in the unlikely event we're unable to unlock your phone.

At UnlockBase, we want you to get the best value for your money, which is why we're willing to match any other legitimate lower price you might find with our competitors.

Just let us know and we'll do our best to match the price, or even offer you a better deal. And, since we like doing things transparently, we'll also update our website with the new prices within 48 hours.

Step 4: Enter The Unlock Code

The last step of getting your SIM-free phone is **entering the unlock code** that we send you.

If you have an Android phone, you'll want to download [Device Unlock](#) before you enter the code. Device Unlock is an Android app that allows you to conveniently request and apply the unlock code directly from your phone.

For Android users, once you've downloaded the app, you're ready to unlock your phone. Another great feature here is that you have the option of unlocking your phone permanently, or just temporarily.

Either way, the process takes 1 to 2 minutes, and after restarting your phone, it will function as a SIM-free phone, allowing you to either completely switch to a new cell provider or to simply slip in a local SIM card whenever you're abroad.

And that's it!

After these easy 4 steps, you're free to use your phone with any carrier you choose.

Alternately, you have another option to consider: you're free to **resell your phone at its original price.**

Conclusion

The easiest way to make sure you have a service package that truly works in your favor is by unlocking your cellphone.

All you have to do is to select your phone model and current service provider, input your phone's unique IMEI, request your code and then enter it. The whole process takes practically no time, and gives you the flexibility to:

- o Pick any carrier or package
- o Use local SIM cards when you go abroad
- o Resell your phone at its original price
